

# RealVideoTour

- Video on the web is the marketing tool of the future!
- 3db Productions allows you to provide a detailed live action RealVideoTour of your home online.
- We create a custom website featuring your listing complete with full motion video blended with still photos, descriptive text, and royalty-free music.
- We provide Windows Media and iPod compatible downloads. We can also create a DVD of the RealVideoTour for the ultimate visual quality.
- We use high quality embedded Flash so there is no need to download clunky external players to view the video. It works on all the popular browsers.
- We come to your location, video and photograph your home, build the 3db Productions Real VideoTour webpage and host it on our server.
- RealVideoTours are the most compelling way to convey the look and feel of your home.
- If a picture is “worth a thousand words,” then a RealVideoTour is “the whole story.”
